

*The Ghost chair employs leather, thick steel wire and solid wood to form its experimental shape.*

The Ghost Chair is an extraordinary chair with a vivid expression. It employs thick steel wire, solid wood and a leather back rest to form the experimental shape. The base, the back and the arm rests draw the chair's sharp, ghostly silhouette.

Ghost Chair comes in table height, counter height and bar height. The table height has, as an option to the regular floor runner, a four legged stackable base.
